## Work Experience

### Web App Developer EyeLook Media Inc.

2021-PRESENT

#### Tools and Technologies Used:

##### Laravel

- ✓ Livewire
- ✓ Jetstream
- ✓ Breeze
- ✓ AUTH & Permissions

##### Node.js

- ✓ Electron.js

##### JavaScript

- ✓ Vanilla
- ✓ Vue.js
- ✓ JQuery
- ✓ PWA

##### CSS

- ✓ Vanilla
- ✓ Tailwind
- ✓ Vuetify
- ✓ Bootstrap

##### Databases

- ✓ MySQL
- ✓ Amazon AWS S3

- Authored multiple interactive kiosks with a vanilla JavaScript frontend and Laravel backend with relational MySQL databases to client specs to create engaging experiences for users that provide service to 300+ users daily.
- Developed analytics reporting systems that governed many aspects of the business and allowed decision makers easy access to all pertinent data.
- Deployed applications to AWS using a variety of services and tools including S3, API gateway providing reliable delivery of SaaS products.
- Designed RESTful APIs to link together several services to an end-user product.
- Coded and maintained custom integrations between Duda eCommerce and client-facing UI.
- Regularly researched, practiced with, and learned new technologies to find ways to add them to my development toolbox. My goal is to be embarrassed by only what I knew 6 months ago.
- Worked directly with staff and clients to elicit requirements for projects, then transformed those requirements into wireframes and statements of work.
- Strived to understand my clients needs and processes to tailor the solution to meet and exceed those needs.
- Effectively used, Visual Studio, GIT and GitHub Desktop to manage codebases and collaborate effectively with teammates.

### Database Development Lead The Liberty Project

2021

#### Tools and Technologies Used:

##### Access

##### Visual Basic

- Research and integrate custom raw data for testing based on the client's schema requirements.
- Develop an Access database for the client to maintain donor, donation, transaction, and registration information.
- Automate all processing of tables, queries, reports, and functions using custom VBA scripting.
- Collaborate on a team to develop the client's online event platform for their most recent fundraising event.

**Planning & GIS Technician**  
**The County of Middlesex**

**2010 - 2019**

**Tools and Technologies Used:**

Access

MySQL

Python

- Development and technical support for management of spatial databases supporting GIS systems.
- Provided recommendations regarding software upgrades, and efficiencies.
- Project management for diverse applications.
- Processed planning applications, verifying information against established standards.
- Liaised between teams, departments, and public regarding data, documentation, and mapping within an urban planning context.

## Education

**GIS - Applications Specialist**  
**Fleming College**  
**09/2020 ~ 07/2021**

**Classes Taken**

- ✓ Web Design & Programming
- ✓ Database Principles
- ✓ Web GIS Development
- ✓ Custom GIS Applications
- ✓ GIS Database Development

- Received a grounding in the principles of web technologies that has served me throughout my career.
- Begun a love of programming that has never ceased to both challenge and give me the tools to provide value in my work.
- Learned the fundamentals of user experience and how to create engaging content.

**GIS & Urban Planning**  
**Fanshawe College**
